

ATTENTION

Notice to Patients with Canadian Dental Care Plan coverage

Health Canada has recently implemented changes to the Canadian Dental Care Plan (CDCP) without consultation. These changes affect how commercial laboratory fees are reimbursed and impose limits. At this time, Health Canada has not published the new reimbursement limits for these lab-related costs.

As a result, please be aware your out-of-pocket expenses may be higher than expected. In some cases, patients have experienced additional charges of several hundred dollars.

Please remember that this is a government subsidy program, not an office-managed plan. We kindly ask that any concerns or feedback be directed to your Member of Parliament, as our office staff have no control over CDCP policies or reimbursement rates.
